

DermaSweep Epi Informed Consent

Today's Date: _____

Overview

Please initial after reading each of the following statements:

- _____ Multiple, consecutive treatments are performed.
- _____ Avoid sun exposure and always use a sunscreen of SPF 15+
- _____ I agree to comply with the pre and post treatment instructions given to me by my professional

Treatment

- Erythema (redness) may be seen after treatment and may last a couple of hours
- There is a possibility of some dryness and/or flaking of the skin that may occur after 24-72 hours. This is due to residual exfoliation from the treatment and can be a normal side effect. Not everyone will experience this.

Pre-Treatment Instructions

- Do not use medications causing photosensitivity for 4 weeks.
- If you have Herpes Simplex, starting an anti-viral medication prior to treatment is recommended to reduce risk of outbreak.

Post-Treatment Instructions

- Avoid direct sun exposure for 48 hours. You must wear sunscreen daily.
- Tanning should be avoided for 4 weeks post treatment.

Maintenance

A customized home care regimen will be recommended to enhance and support the results of your treatment. Repeating this treatment monthly will provide maximum skin improvement and will build on results of first treatment.

Makeup

Makeup may be worn as soon as you would like. WellQuest Medical & Wellness recommends Glo Minerals. This is an extension of your skin care.

Reactions

If you experience any reactions, call WellQuest Medical & Wellness immediately at 479.845.0880

Acknowledgement

This procedure has been explained to me by my professional and my questions were answered. If you have any questions, please contact WellQuest Medical & Wellness. Further, I understand that all package / series expire after 1 year.

I acknowledge that I have read, understand, and agree to follow the instructions above. I hereby give my consent to this procedure.
